Abstrak

Penelitian ini diinspirasi oleh peningkatan perilaku seksual dalam berpacaran dan fakta semakin mudahnya akses pornografi bagi anak. Tujuan studi adalah mengidentifikasi kebutuhan akan informasi seksualitas pada remaja. Guna mendapatkan pemahaman yang komprehensif dilakukan survei terhadap 530 remaja yang berusia 11-18 tahun, terdiri dari 261 laki-laki dan 269 perempuan. Data dianalisis secara deskriptif dengan mengkategorisasikan respon dari partisipan. Temuan menunjukkan bahwa remaja ingin mengetahui tentang enam hal yakni perilaku seksual, hubungan seksual, makna seks sebenarnya, sistem reproduksi, dan problem seksual.

IDENTIFICATION OF ADOLESCENTS' NEED ABOUT SEXUAL INFORMATION

Abstract

This research was inspired by the increasing of adolescent's sexual behavior in courtship and the fact that pornography recently more accessible to children. The purpose of this study is to identify the needs of adolescent for sexual information. In order to gain an understanding of the needs of adolescents in a comprehensive manner, survey was conducted to gather data. Around 530 adolescents from 11- 18 years old participated to the survey, which consisted of 261 male students and 269 female students. The data collected analyzed descriptively, by categorizing responses from participants. The findings show that adolescents want to know about sexuality including six categories of topic, that are sexual behavior, intercourse, the true meaning of sex, reproductive system, psychosexual and sexual problem.
