**Abstract**

*Haw teachings is one of the Confucianism. This study examines the nature of devotion (haw) in young male offspring of the haberdasher crossbreed Chinese nuclear families in Pondok Cina, Depok, Indonesia. Results indicate a shift of cultural values embraced China. The reason is the status categorized as crossbreed Chinese, who generally have a pattern of behavior and a different life with full-blooded Chinese.*

**Key Words:** *Haw, Chinese family, Indonesia*
